**Canadian Federal Women Offender Profiles:
Trends from 1981 to 2002 (Revised)**

Roberta Lynn Sinclair
Roger Boe

Research Branch
Correctional Service of Canada

**Revised:
December 2002**

EXECUTIVE SUMMARY

This report summarizes and presents profiles of the federal women inmate population over a twenty-two-year period, from 1981 to 2002. The report extends the trends covered in the earlier *Canadian Federally Incarcerated Adult Women Profile Trends from 1981 to 1998* (Colleen Anne Dell, Roberta Lynn Sinclair and Roger Boe, CSC Research Branch, Report R-99, 2001¹) up to the 2002 fiscal year-end. The original report was written in response to a special request from the Heads of Corrections and the format and many of the passages describing the data sources are drawn directly from the initial report.

The information used to compile this report is derived from three sources: the **Offender Population Profile Reports** (1981-1991); the **Offender Population Profile System** (OPPS, 1992-1993), and the **Offender Management System** (OMS, 1994-2002). The latter two sources are electronic databases while the first is a multi-volume report that was compiled quarterly until 1991. All three sources represent official Correctional Service of Canada offender population statistics. It is important to note that the OMS database, while it represented a significant advance in the amount of information on offenders, also introduced new data definitions that disrupted the continuity of several historical series such that current information may no longer directly matches the old definitions.²

The March 31 population profiles typically present federal offender information directed toward **6 offender** characteristics and **6 offence** characteristics. For the purpose of this report, the actual numbers are analyzed where appropriate to

¹ The 2001 Report on federal adult women offenders grew out of a special request from the Heads of Corrections, that was originally reported in: **Adult Female Offenders in Canada: Recent Trends**. Colleen Anne Dell and Roger Boe, Research Branch, Correctional Service Canada May 15, 1998 (Research Brief No. B-21).

² In cases where the data is not available for the full twenty-two year period; those instances are clearly noted in the report.

examining some trends, but generally the trends are presented in terms of changing proportions (i.e., as a percentage of the total federal women inmate population).

Highlighted findings of the proportion of the federal women inmates include:

1. Federal Women Incarceration Rate:

- The federal women offender population increased by approximately 75% from 1981 to 2002 (i.e., from 200 to 351). However, when we control for the increase in the population of adult women in Canada during this period - the incarceration rate of federal women prisoners per 100,000 adult women in the population edged up only slightly (i.e., from 2.2 in 1981 to 2.8 in 2002). The average incarceration rate for federal women has remained much lower than that for federal men (average of 2.7 for women versus 116 for men incarcerated per 100,000 adult men or women in Canada since 1981).

2. Age Distribution:

- There was considerable “ageing” of the federal women inmate population from 1981 to 2002. The proportion of women offenders under the age of 25 decreased from 25% in 1981 to 15% in 2002 and the proportion of women offenders over 25 increased from 75% in 1981 to 85% in 2002.

3. Race:

- There was a significant increase in racial diversity of the federal women inmate population between 1981 and 2002. Caucasian women decreased in overall proportion from 78% of the inmate population in 1981, to 61% in 2002. Aboriginal representation increased significantly from 18% in 1981 to 27% in 2002. The representation of Black women also increased during the period, from 1% to 6% over the twenty-two-year period. Asiatic women increased from 1% in 1981 to 4% in 1996, but they have since dropped back to 1% in 2002.

4. Marital Status:

- The marital status of federal women fluctuated considerably over the twenty-two years, without any outstanding trend. Since 1981, roughly 4 out of every 10 federal women were single.

5. Citizenship:

- The citizenship of federal women inmates remained predominately Canadian from 1981 to 2002, with a just a slight overall increase in Canadian Citizenship over the whole period (from 92% in 1981 to 97% in 2002).

6. Primary Language Spoken:

- The majority of federal women inmates reported English as their primary language spoken, which increased from 1981 (76%) to 2002 (82%). The proportion that reported French as their primary language increased from 9% in 1981 to 18% in 2002. The proportion of women who spoke both English and French decreased during this 18-year period, from 14% in 1981 to 4% in 1998.

7. Region of Residence at Time of Conviction:

- Because of administrative reporting changes, there are few clear trends in the Region of Residency at time of Conviction. There was an overall increase in the proportion of women who were residents of the Ontario region (from 21% in 1981 to 28% in 2002). There was a decrease in women who were residents of the Pacific region (from 20% in 1981 to 9% in 2002). The Quebec region experienced a decrease from 1981 (26%) to 2002 (18%) while the Atlantic region increased from 8% in 1998 to 11% in 2002. The proportion of women from outside Canada remained relatively the same.

8. Type of Admission:

- A majority of women admitted to a federal penitentiary were by a Warrant of Committal directly from the court. In 1981 they represented 87% of admissions but by 2002 this had declined to 81%. Since 1991, the proportion represented by Revocations from Community Supervision has been increasing, from 5% in 1991 to 17% in 2002.

9. Most Serious Offence

- Crimes of Violence represented the most serious offence for federal women, at between 50% and 60% over the whole period between 1981 and 2002. To put

this finding in context it is important to remember that this research focuses wholly on federal incarcerations (i.e., sentences of 2 years and over). The proportion of women offenders incarcerated for a Property Crime slightly decreased (9%) and Drug Offences slightly increased (4%).

10. Aggregate Sentence:

- There is a gap in this series because of administrative reporting changes. Overall, there was a small increase in the proportion of women receiving sentences of 2 to 5 years from 48% in 1981 to 53% in 2002. This was offset by a decrease in the proportion of women serving sentences between 5 and 10 years (down from 27% in 1981 to 15% by 2002). During this same period, the proportion of women offenders serving a Life sentence decreased from 16% to 14%.

11. Time Served Since Last Admission:

- The proportion of federal women who had served 12 months or less since their last federal penitentiary admission increased from 38% in 1981 to 55% by 2002. Women serving 1-to-2 years decreased from 23% to 18%, from 2-to-5 years decreased from 27% to 14%, and 5+ years decreased from 12% to 8% in 1998 and then increased until 2002 (13%).

12. Number of Previous Commitments:

- Overall, approximately 82% of federal women were serving their first federal terms; this proportion dropped to around 71% after 1998.

13. Region of Sentence:

- Because of administrative reporting difficulties with this series, no clear trends are possible. Overall, however, the proportion sentenced in the Ontario region decreased from 1998 to 2002. During the same period the rates in the Prairie and Atlantic regions increased, while Quebec and the Pacific region remained relatively unchanged.

INTRODUCTION

Limited attention has been given to an historical profile of the federal women inmate population of Canada. Other than information observed by individuals working within the correctional field, only minor data have been gathered on the consistency and/or fluctuation in the profile of the women in federal prisons over longer time periods.

The purpose of this investigation is to examine the profile of the federal women inmate over more than two decades — from March 1981 to March 2002. Six offender specific characteristics and six offence specific characteristics are examined. Offender characteristics refer to an individual's personal identifying factors (i.e., age, citizenship) and offence characteristics pertain to elements relate to an individual's criminal offence(s) (i.e., type of offence, aggregate sentence).

The information is presented as: (1) tables at the end of the main report (Appendix C) which provide the actual numbers and percentage distributions, and (2) charts in the body of the report, which typically present the information as a proportional trend. This provides the reader with information on two separate areas. The first provides an accurate portrayal of the federally incarcerated women population. The second allows for a comparison of increases/decreases of the actual numbers with the total population for a proportional understanding.

Although Royal Commissions, Inquiries and Task Forces have been conducted on women corrections in the 20th Century in Canada, it is only within the past decade that women offenders have been physically distributed among special federal women's institutions in each Region.³ The restructuring of the system from one central federal correctional institution, the Prison for Women in Kingston, Ontario, to

³ The regions of Canada are: Atlantic Region (consisting of Newfoundland, Prince Edward Island, Nova Scotia, and New Brunswick); Quebec Region; Ontario Region (now including Nunavut Territory); Prairie Region (consisting of Manitoba, Saskatchewan, Alberta, the Northwest Territories [less Nunavut], and that part of Ontario from the lakehead west); and, Pacific Region (comprising British Columbia and the Yukon Territory).

five regional facilities was initiated by the Report of the Task Force on Federally Sentenced Women.⁴ The first of the new institutions opened in Edmonton, Alberta in 1995, followed by Nova, Okimaw Ohci, Grand Valley, etc. The trends identified in this report may be of significance to the operational future of the regional women institutions, ranging from appropriate offender programming and accommodation to staffing requirements.

⁴ Source: *Creating Choices: Report of the Task Force on Federally Sentenced Women*. (1990). Ottawa: Ministry of the Solicitor General.

HISTORICAL TRENDS

The data used in this report are compiled from three sources.⁵

1. The first source is the information that was published quarterly in the *Offender Population Profile Reports*, from 1981 to 1991, by the Management Information System Division of the Correctional Service Canada. The Offender Population Profile Reports are snapshots of inmates “on register” at an institution on specific dates of each year. The end of the fiscal year, March 31st, is the data publication date normally used in this report.⁶ Note that inmates escaped or unlawfully at large from an institution are included on the institution register counts.
2. The second source of data used in this inquiry is the *Offender Population Profile System* (OPPS), which is the electronic system developed in 1990 to compile electronic offender population profiles similar to the earlier paper reports. This source was used for 1992 and 1993, and accounted for both federal inmates who may be incarcerated in provincial institutions and provincial inmates incarcerated in federal institutions. The end of fiscal year (March 31st) date was used.
3. The third data source used to compile this report is the *Offender Management System* (OMS). OMS is CSC’s newest offender information database (September 1993) and offender profile statistics are compiled by extracting the appropriate information for the years 1994 to 2002. Once again, federal inmates who may be incarcerated in provincial institutions and provincial inmates incarcerated in federal institutions, under the federal/provincial transfer agreement, are accounted for. The data for the Tuesday nearest to the fiscal year (March 31st) date are used.
4. All three sources represent official Correctional Service of Canada offender population statistics. While the new OMS database represented a significant

⁵ Information on the methodology employed in this report is provided in Appendix A.

⁶ This is true for every year except 1981, for which September 30 is used because it is the first report of the series.

advance in the amount of information collected on offenders, new definitions introduced into this information also disrupted the historical series in a number of cases where current information definitions no longer directly matches the old ones.

The information presented in this report is provided as both: (1) the actual numbers, and (2) a percentage of the total federal women inmate population. Each is explained using most serious offence as the example.

The *actual number* indicates characteristics of the total number of federal women inmates. For example, 30 women were incarcerated in Canada in 1981 for a property crime (out of 200 total).

The *percentage of total federal women inmate population* is the percentage of federal women inmates with a specific characteristic as a proportion of the total incarcerated women population. For example, in 1981, 15% (30 divided by 200) of the federal women inmate population was incarcerated for a property crime.

1. Incarceration Rates:

- The total number of women incarcerated under federal jurisdiction in Canada increased by approximately 75% between 1981 (200) and 2002 (351). Thus there were approximately **1.75** times as many federal women offenders in 2002 as in 1981.

Chart 1A: Total Number of Federal Women Inmates, 1981-2002

- However, the increase in the federal women offender population did not significantly outstrip the growth of the population of adult women in Canada during the same period. The incarceration rate of federal women prisoners per 100,000 adult women population in Canada increased from 2.2 (1981) to 2.8 (2002). As well, the rate continues to be significantly lower than the male incarceration rate, which is illustrated below.

Chart 1B: Incarceration Rates of Federal Women and Men, 1981-2002

2. Age Distribution:

Actual Number

- Women inmates less than 18 years of age remained stable at zero from 1981 to 2002, other than in 1982 (2) and 1984 (1).
- There was great fluctuation in the number of women ages 18 to 24, with an overall increase from 1981 (50) to 1987 (70), followed by a significant decrease to 1994 (29), a significant increase to 1996 (55), and decreasing again to 1998 (40). This decrease was followed by an increase to 53 (1999 and 2000) and then to 56 (2001 and 2002). Overall, there was an increase from 1981 (50) to 2002 (56).
- In the 25 to 34 category, there was an overall increase from 1981 (89) to 1991 (136) followed by great fluctuation with an overall downward trend through to 1998 (117). A substantial increase in 1999 (145) was followed by a decrease in 2000 (131) after which there was an increase to the highest number (148) in 2001 and 2002.
- The 35 to 49 category increased significantly from 1981 (51) to 1992 (135). A downward trend followed until 1995 (110) replaced with an increase trend through to 2002 (134). There was marked fluctuation throughout, with the peak in 1992 (135) and the low in 1983 (43).
- There was an overall increase in the 50 plus category from 1981 (10) to 1993 (41), decreasing to 1996 (22), followed by fluctuating increases stabilizing in 2001 and 2002 (29).

Percentage Distribution by Age

- There was zero population in the under 18 category, with the exception of 1982 and 1984.
- The proportion of women 18 to 24 years of age decrease from 25% in 1981 to 15% in 2002.

- The 25 to 34 category decreased overall from 1981 (45%) to 2002 (40%). There was fluctuation between the years, specifically from 1995 to 2001.
- The 35 to 49 age group increased overall from 1981 (26%) to 2002 (37%). There was a relatively stable increase from 1981 (26%) to 1991 (43%) followed by fluctuation ranging from 37% to 41% until 2002 (40).
- The 50 plus category increased from 1981 (5%) to 1993 (13%), decreased to 1997 (7%), and increased slightly in 1998 (10%). The rate decreased to 7% in 1999 and 2000 and 8% in 2001 and 2002.

Chart 2: Age Distribution of Women Inmates, 1981-2002

Note: Sum of individual categories may not total to 100% because of missing or unknown cases.

3. Race:

Actual Number

- There was a fairly steady increase in Caucasian from 1981 (158) to 1993 (228), followed by a decrease to 1996 (178). An increase to 1999 (210) and a decrease in 2000 (194) were followed by an increase in 2001 (223) and a decrease in 2002 (213).
- There was an overall general increase in Aboriginal from 1981 (35) to 2002 (94).
- There was an overall increase in Asiatic from 1981 (1) to 1992 (10). This was followed by a decrease until 1995 (4). Increased rates fluctuated until 1999 (11) when a decrease trend began through to 2002 (3), which is the same number as in 1986 when the initial increase occurred.
- There was a substantial increase in Black from 1981 (2) to 1997 (37) followed by a decrease in number until 2002 (21). The greatest consecutive increase occurred between 1989 (10) and 1990 (25).
- There was an increase with fluctuation in the Other category from 1981 (4) to 2002 (20). The greatest increase occurred between 1997 (22) and 1998 (38).

Percentage Distribution by Race

- Caucasian consistently decreased from 1981 (78%) to 1992 (65%). This was followed by an increase in 1993 (71%), decreasing steadily again until 1997 (58%), with slight fluctuation continuing until 2002 (61%).
- Aboriginal remained relatively stable from 1981 (18%) to 1999 (20%). There is an increase in the latter years reaching the highest rate in 2002 (27%).
- Asiatic was similar to the actual numbers with an overall increase from 1981 (1%) to 1992 (3%). This was followed by a decrease to 1995 (1%) and an increase in 1996 (4%) which was followed by a decrease trend to 2002 (1%).

- There was an increase in Black from 1981 (1%) to 1989 (4%). There was a sharp increase in 1990 (8%), remaining relatively stable to 1995 (7%). A substantial increase in 1996 to 12% was followed by a decrease thereafter to 6% in 2002.
- There was an increase in Other from 1981 (2%) to 1993 (5%). The rate decreased in 1994 (4%), and was followed by an increase to 1998 (12%). A decrease trend then continued until 2002 (6%).

Chart 3: Race of Women Inmates, 1981-2002

Note: Sum of individual categories may not total to 100% because of missing or unknown cases.

4. Marital Status:

Actual Number

- There was an increase in single from 1981 (90) to 2002 (149). There was relative stability from 1986 (132) through to 2002 (149), ranging from between 128-153.
- Married/Common-Law increased with minor fluctuation from 1981 (61) to 1992 (108), followed by a decrease to 1996 (84). An increase trend began in 1997 (92) and continued through to 2001 (140) followed by a decrease in 2002 (132).
- Widowed remained relatively stable from 1981 (13) to 1993 (13), followed by a sharp increase in 1994 (36) through to 1997 (38). A sharp decrease in 1998 (18) was followed by an increase in 2001 (20) and a slight decrease in 2002 (18).
- Separated/Divorced fluctuated from 1981 (34) to 2002 (39), yet remained at a relatively stable rate over the 22-year period. The peaks were in 1986 (49) and 2001 (48) and the low was in 1995 (28).

Percentage Distribution by Marital Status

- There was a slight decrease in single from 1981 (45%) to 2002 (42%). However, there was fluctuation throughout the twenty-two year period with the highest point in 1987 (54%) and the lowest point in 2001 (40%).
- Married/Common-Law increased slightly from 31% in 1981 to 35% in 1992, decreasing to 27% in 1996, followed by an increase to 38% in 2000.
- Widowed decreased from 1981 (7%) to 1992 (3%) when increased rates occurred until 1996 (14%). The rate then decreased to 5% by 2002.
- From 1981 to 2002, Separated/Divorced decreased (17% to 11%), with the highest rate in 1986 (18%) and the lowest plateau from 1995 to 1997 and 2000 (9%).

Chart 4: Marital Status of Women Inmates, 1981-2002

Note: Sum of individual categories may not total to 100% because of missing or unknown cases.

5. Citizenship:

Note: After 1994, the OMS categories of Citizenship data collected changed to “Canadian,” and “Non-Canadian” (there was about 1 case of “Dual” citizenship).

Actual Number

- There was a relatively steady increase in Canadian from 1981 (184) to 1993 (280). The rate decreased in 1995 (262) returning to an increased trend in 1998 (300) through to 2002 (339).
- There was a decrease in American from 1981 (12) to 1984 (6), increasing thereafter to 1993 (16).
- Non-Canadian decreased steadily from 1995 (40) to 2002 (10).
- Dual remained stable at approximately 1.
- There was an overall increase in Other/Unknown from 1981 (4) to 1992 (39), followed by a sharp decrease in 1995 (1).

Percentage Distribution by Citizenship

- Canadian decreased steadily from 1981 (92%) to 1991(83%) followed by an increase back to 97% by 2002. The lowest points were in 1990 and 1991 (both 83%). A slightly lower rate in 1995 (86%) was followed by an increase trend from 1998 (93) to 2002 (97).
- There was a slight decrease in American from 1981 (6%) to 1993 (5%), fluctuating throughout with the high in 1981 and 1990 (6%) and the low in 1983-1986 and 1988 (3%).
- The Non-Canadian rate decreased steadily from 1995 (13) to 2002 (3).
- There was an overall increase in Other/Unknown from 1981 (2%) to 1991 and 1992 (both 12%). After 1995 the proportion hovered around 0%.

Chart 5: Citizenship of Women Inmates, 1981-1993, 1995, 1998-2002

Data not available for 1994 and 1996-1997.

6. Primary Language(s) Spoken:

Actual Number

- There was an increase in English from 1981 (151) to 2002 (287). There was an increase from 1981 (151) to 1983 (171), followed by a decrease to 1985 (156). An overall increase through to 2002 (287) followed.
- There was an increase in French from 1981 (18) to 1993 (61), with a decrease starting in 1994 (58) through to 1996 (35). This was followed by an increase in number to 2002 (62).
- Both languages spoken, English and French, remained relatively stable from 1981 (28) to 1988 (27), followed by a sharp decrease to 1990 (5). An overall increase to 1996 (20) was followed by a decrease trend to 1998 (13).
- Neither language spoken, French nor English, fluctuated slightly through the 22-year period, with the highest point in 1999 (9) and the lowest in 1998 (0). There was an overall decrease from 1981 (3) to 2002 (2).

Percentage Distribution by Primary Language Spoken

- There was an increase from 76% in 1981 to 82% in 2002 in English.
- Overall, there was a two-fold increase in French from 9% in 1981 to 18% in 2002.
- Both languages spoken, English and French, fluctuated, revealing an overall decrease from 1981 (14%) to 1998 (4%). Note the low proportion between 1990 and 1993 (average 2%).
- Neither languages spoken, French nor English, fluctuated slightly, with an overall decrease from 1981 (2%) to 2002 (1%).

Chart 6: Language Spoken by Women Inmates, 1981-2002

Note: Sum of individual categories may not total to 100% because of missing or unknown cases.

7. Region of Residency at Time of Conviction:

Actual Number

- There was a decrease in the Atlantic region from 1981 (15) to 1985 (13), and a significant increase in 1986 (24), followed by a decrease to 1988 (14) and an increase to 1993 (22). A significant decrease occurred in 1995 (9) followed by a significant increase in 1998 (31) that was sustained until 2002 (39).
- There was an overall increase in the Quebec region from 1981 (51) to 1990 (72). This increase was followed by a decrease until 1995 (58). A significant increase in 1999 (73) was followed by a decrease and then increase trend to 64 in 2002.
- In the Ontario region there was a steady and dramatic increase from 1981 (41) to 1995 (129), followed by a decrease through to 2002 (99).
- There was great fluctuation in the Prairie region from 1981 (42) to 1987 (69), followed by an increase trend to 2000 (124). Decreases in 2001 (1202) and 2002 (116).
- There was a decrease in the Pacific region from 1981 (39) to 1985 (33), followed by a significant increase in 1986 (52) that was stable to 1988. A decrease to 2000 (30) was followed by a slight increase to 2002 (33).
- Outside Canada had slight fluctuation, with an overall increase from 1981 (12) to a peak in 1991 (28).

Percentage Distribution by Region of Residence at Time of Conviction

- Overall, there was fluctuation in the Atlantic region with a slight increase from 8% in 1981 to 11% in 2002.
- In the Quebec region, there was some fluctuation, with an overall decrease from 1981 (26%) to 2002 (18%). After 1993 (24%) the rate decreased rather steadily.
- In the Ontario region, there was an increase from 21% in 1981 to 31% in 1992. A sharp increase in 1995 (42%) was followed by a decrease trend until 2002 (28%).

- There was an increase in the Prairie region from 1981 (21%) to 2002 (33%), with slight fluctuation throughout.
- In the Pacific region, there was a relatively stable decrease from 1981 (20%) to 2002 (9%).
- Outside Canada/Unknown residency had slight fluctuation, with an overall rate from 1981 to 1993 around 6%, and thereafter zero.

Chart 7: Region of Residence at Time of Conviction of Women Inmates, 1981-1993, 1995, 1998-2002

Note: Sum of individual categories may not total to 100% because of missing or unknown cases.

Data not available for 1994 and 1996-1997.

8. Type of Admission:

Actual Number

- There was an overall increase in Warrant of Committal from 1981 (173) to 1993 (287). This was followed by a decrease to 1995 (240), increasing thereafter to 1999 (280). Lower numbers in 2000 (272) and 2001 (275) were followed by a higher number in 2002 (285).
- Revocations from Community Supervision decreased from 1981 (23) to 1989 (13). A steady increase began in 1990 (17) through to 2001 (89). A lower number followed in 2002 (61).
- There were lower numbers of Provincial/Federal Transfers from 1981 (4) to 1984 (4). These were followed by higher numbers 1985 (5) to 1990 (14). The numbers drop of significantly in 1991 (7) with no Provincial/Federal Transfers from 1996-2002.
- The category of Other consistently fluctuated at a low number between 1981 and 2002. The highest points were in 1990 and 1996 (8).

Percentage Distribution by Type of Offence

- Warrant of Committal fluctuated slightly (between 79% and 92%) and declined overall from 1981 (87%) to 2002 (81%).
- Revocations from Community Supervision decreased from 1981 (10%) to 1992 (7%). The rate returned to 10% in 1993 and increased until 2001 (24%) followed by a decrease in 2002 (17%).
- Provincial/Federal Transfers remained at a steady percentage from 1981 to 1986 (2%), increasing from 1987 to 1990 (average 5%), and then decreasing to zero from 1994 onward.
- The category of Other/Unknown has fluctuated mainly around 0% but rising as high as 3% occasionally (reached in 1990, and 1996).

Chart 8: Type of Admission of Women Inmates, 1981-2002

9. Most Serious Offence:

Actual Number

- There was an almost two-fold increase in Crimes of Violence from 1981 (110) to 2002 (202). A downshift in 1991 (174) and 1995 (167) was followed by an increase trend to 2002 (202).
- Property Crimes fluctuated from 1981 (30) to 1984 (28) and remained stable to 1985. An increase trend began in 1986 (35) and continued to 1988 (44), followed by a decrease to 1991 (33). A significant increase occurred in 1995 (72) and 1998 (75), after which the number decreased to the lowest numbers in the time span (2002 – 21).
- Drug Offences increased from 1981 (32) to 1985 (36), increasing sharply in 1986 (66), and decreasing substantially in 1987 (45) through to 1989 (42). A significant increase occurred in 1990 (57) through to 1991 (67). The number remained relatively stable from 1995 (56) until reaching a peak in 2001 (77) followed by a slight decrease in 2002 (69).
- Other Crimes increased, with slight fluctuation, from 1981 (28) to 1991 (37). Low numbers in 1995 and 1998 (0's) were followed by a significant increase in 1999 (66) with high numbers until 2002 (58).

Percentage Distribution by Most Serious Offence

- There was relative stability in Crimes of Violence from 1981 (55%) to 2002 (58%). The rate fluctuated moderately throughout the period, reaching its peak in 1984 (62%) and its low of 50% in 1999 and 2000.
- Property Crimes decreased from 1981 (15%) to 2002 (6%), noting slight fluctuation throughout, peaking in 1995 (24%).
- Overall, Drug Offences increased from 1981 (16%) to 2002 (20%). The peak in 1986 (24%) was followed by a decrease to 1989 (15%) and an increase to 1991 (21%). A similar decrease pattern followed until 1999 when an increase pattern began through to 2002 (20%).

- Other slightly decreased from 1981 (14%) to 1991 (12%). The rate increased significantly in 1999 (19%) followed by slight decrease fluctuation to 2002 (17%). Overall, the rate increased slightly from 1981 (14%) to 2002 (17%).

Chart 9: Most Serious Offence of Women Inmates, 1981-1991, 1995, 1998-2002

Note: Sum of individual categories may not total to 100% because of missing or unknown cases.

Data not available for 1992 – 1994 and 1996-1997.

10. Aggregate Sentence:

Actual Number

- There was an overall increase in Less Than 2 Years from 1981 (11) to 1991 (15), averaging at 12. In the later years (1999 – 2002) the number was approximately 3 times higher, ending with the 48 in 2002.
- Two to 5 Years notably increased from 1981 (95) to 1998 (190), with minor fluctuations throughout. After 1999 (176), the number decrease but rose again in 2001 (167) and reached (187) in 2002, approximately two-times the number in 1981.
- Five to 10 Years increased from 1981 (53) to 2002 (54). There was consistent fluctuation throughout the time period ranging from a high of 67 in 1986 to the low of 39 in 1998.
- There was an overall increase from 1981 (8) to 1998 (20) in the 10 to 15 Years category. This increase was followed by a decrease trend in the latter years (1999 – 2002) ending in 2002 at 12.
- Acknowledging the extremely small number within the 15 to 20 Year category, there was relative stability between 1981 and 1990, at an average of 2. An increase in 1994 (5) was followed by a decrease through to 2002 (2).
- There was relative stability in the 20 Plus category from 1981 to 1998, averaging 1. From 1999-2002, there were no aggregate sentences of 20 plus years.
- There was a gradual and significant increase in Life from 1981 (31) to 2000 (84). In the years that followed, the number decreased to 2002 (48).

Percentage Distribution by Aggregate Sentence

- There was relative stability from 1981 (6%) to 1991 (5%) in Less Than 2 Years. From 1999 – 2002, the rate was significantly higher, averaging 13%.
- There was a slight increase from 1981 (48%) to 2002 (53%) in the 2 to 5 Year category, with minor fluctuations throughout.

- There was an overall decrease in 5 to 10 Years from 1981 (27%) to 2002 (15%).
- For 10 to 15 Years, there was fluctuation between 1981 and 1986 (both 4%), plateauing thereafter at 7% in 1996 followed by a decrease to 3% from 1999 - 2002.
- The Fifteen to 20 Year category was stable from 1981 to 2002 at an average of 1%.
- 20 Plus Years decreased from 1% in 1981 to zero in 2002.
- The category of Life increased from 1981 (16%) to 2000 (25%) with a decrease in rate to 2002 (14%).

Chart 10: Aggregate Sentence of Women Inmates, 1981-1991 & 1994-2002

Note: Data were not available for 1992 and 1993.

11. Time Served Since Last Admission:

Actual Number

- There was a substantial increase in Less Than 12 Months from 1981 (76) to 2002 (194).
- Time served between 1 and 2 Years increased (with slight fluctuation) from 1982 (36) to 2002 (63). There was relative stability from 1988 (53) to 1991 (55). A notably higher number in 1994 (73) was followed by a decrease trend until 2002 (63).
- For sentences of 2- to-5 Years, there was a decrease from 1981 (53) to 1984 (35), followed by an increase until 1988 (62), and a decrease to 1995 (51). A three-year increase in numbers reached a plateau in 1998 (61) and was followed by a decrease to 2002 (49).
- There was an increase from 1981 (23) to 1990 (51) in 5 Plus Years. This was followed by a decrease to 1998 (26), after which an increase began through to 2002 (45).

Percentage Distribution by Time Served Since Last Admission

- There was an increase from 1981 (38%) to 2002 (55%) in Less Than 12 Months.
- Time served between 1 to 2 Years increased from 1982 (19%) to 1984 (27%), then decreased in 1985 (19%) to 1991 (17%). A higher rate in 1994 (23%) was followed by a decrease in rate to 2002 (18%).
- Time served between 2 to 5 Years revealed a decrease from 1981 (27%) to 2002 (14%).
- There was an increase in 5 Plus Years from 1981 (12%) to 1990 (17%). A decrease trend ran from 1991 (15%) through to 2002 (13%).

Chart 11: Time Served Since Last Admission of Women Inmates, 1981-1991 & 1994-2002.

Note: Sum of individual categories may not total to 100% because of missing or unknown cases.

Note: Data were not available for 1992 and 1993.

12. Number of Previous Federal Commitments:

Actual Number

- There was a fairly consistent increase in offenders with No Previous Federal Commitments between 1981 (157) and 2002 (256).
- 1 to 5 Previous Commitments slightly increased from 1981(42) to 2002 (91). There were several fluctuations, with the most prominent a decrease from 1993 (70) to 1994 (36) after which the number again underwent an increase trend.
- 6 to 9 Previous Commitments was negligible in representation from 1981 – 1998. A higher number in 1999 (7) was followed by a decrease trend ending in 2002 (3).
- There were no inmates with 10 Plus Previous Commitments between 1981 and 1998. From 1999 – 2002, the number of inmates with 10 Plus Previous Commitments was 1 per year.

Percentage Distribution by Number of Previous Commitments

- Overall, the percentage of inmates with No Previous Commitments increased slightly from 1981 (79%) to 1994 (88%). The rate decreased since that year, ending in 2002 (73%) with a rate lower than in 1981 (79%).
- The percentage of inmates with 1 to 5 Previous Commitments decreased from 1981 (21%) to 1998 (18%). In 1999, the rate increased to 27% and remained close to this level until 2002 (26%). There was fluctuation throughout the time period, with the highest percentage in 2001 (33%) and the lowest in 1994 (11%).
- The 6 to 9 Previous Commitments percentage was sparse.
- There were minimal inmates with 10 Plus Previous Commitments.

**Chart 12: Number of Previous Federal Commitments of Women Inmates,
1981-2002**

Note: Sum of individual categories may not total to 100% because of missing or unknown cases.

13. Region of Sentence:

Actual Number

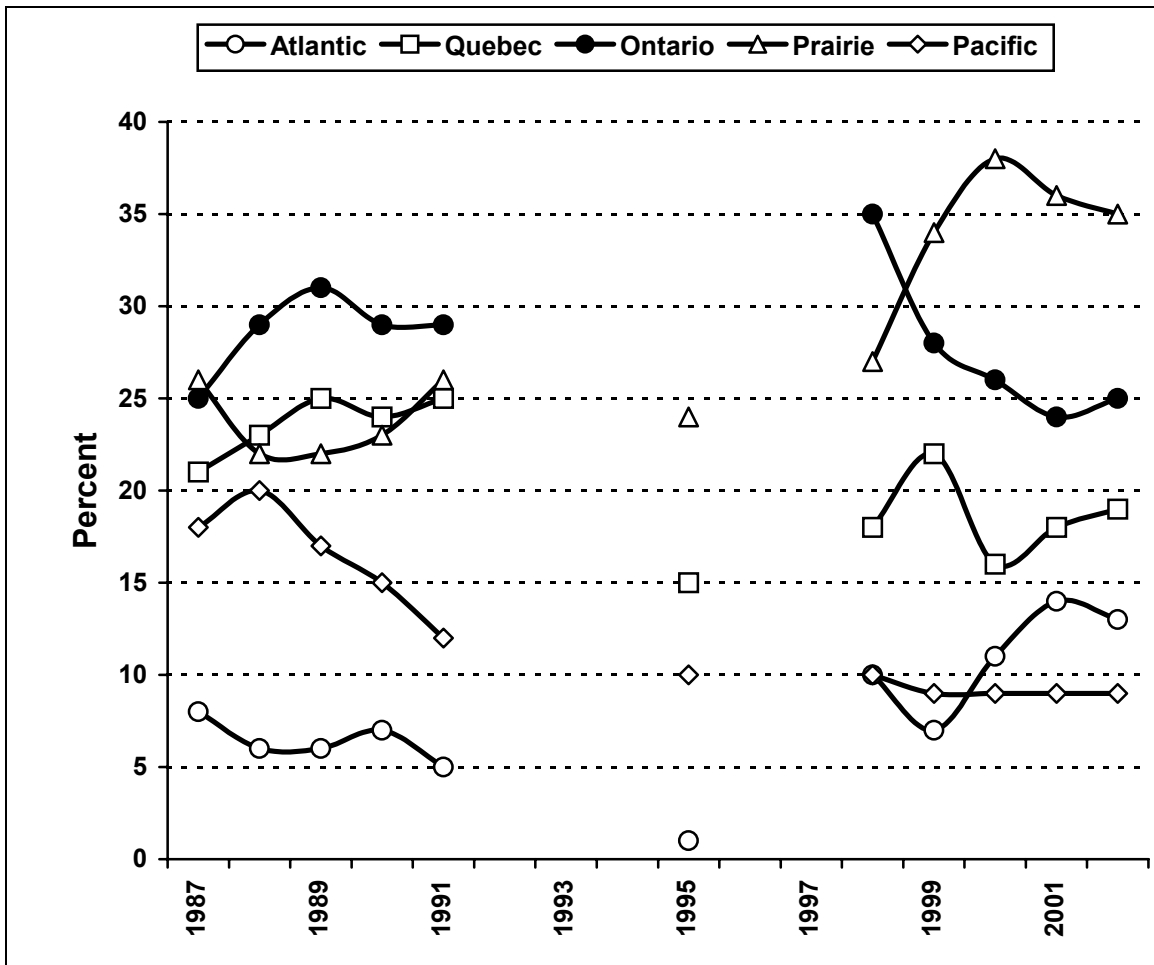

- Overall, the Atlantic Region decreased between 1987 (23) and 1991 (17). A significant decrease in 1995 (3) was followed by a significant increase in 1998 (32). The number continued to increase to the highest numbers in 2001 (52) and 2002 (45).
- There was a steady increase in the Quebec Region from 1987-1991 (59 to 80). This was followed by a significant decrease in 1995 (46) and an increase to 1999 (76). The number remained higher in the latter years – 2001 (65) and 2002 (68).
- In the Ontario Region, there was a steady increase from 1987 (72) to 1995 (153). The highest number was reached in 1995 (153) and the number decreased steadily from 1998 (112) to 2002 (86).
- In the Prairie Region, there was a decrease from 1987 (73) to 1988 (59), followed by an increase trend to 1991 (83). Following a lower number in 1995 (72), the number increased until 2001 (131). The number decreased in 2002 (122).
- There was a steady decrease in the Pacific Region from 1987 (56) to 1991 (36). In the remaining years, the number averaged 31.
- Offenders whose region of sentence was Outside Canada increased slightly from 1 in 1987 to 3 in 1991.

Percentage Distribution by Region of Sentence

- The percentage decreased in the Atlantic region from 1987 (8%) to 1995 (1%). From 1998 to 2002, the rate is significantly higher ranging from 7% to 14%.
- In the Quebec region, the percentage increased slightly from 1987 (21%) to 1991 (25%). The rate decreased in the remaining years to 2002 (19%).
- The percentage increased in the Ontario region from 1987 (25%) to 1995 (50%) and decreased to 2002 (25%).

- The Prairie region experienced fluctuation from 1987-2002 (between 22% and 38% throughout). The rate was higher from 1999 (34%) to 2002 (35%), with the highest rate in 2000 (38%).
- The Pacific region experienced an overall decrease from 1987 (18%) to 2002 (9%).
- Offenders whose region of sentence was outside Canada increased from 1987 (0%) to 1991 (1%), but the percentage remained minimal.

Chart 13: Region of Sentence of Women Inmates, 1987-1991, 1995, 1998-2002

Data not available for 1992 – 1994 and 1996-1997

APPENDIX A: METHODOLOGY

1. Data

Due to inconsistency in data collection methods, not all data for the 1981-2002 period were available. It is indicated in the report where data were unavailable. The accessible data used to compile this report were:

1. Federal women inmate population 1981-2002

OFFENDER CHARACTERISTICS

2. Age Distribution 1981-2002
3. Race 1981-2002
4. Marital status 1981-2002
5. Citizenship 1981-1993, 1995, 1998-2002
6. Primary Language spoken 1981-2002
7. Region of residence at time of Conviction 1981-1993, 1995, 1998-2002

OFFENCE CHARACTERISTICS

8. Type of admission 1981-2002
9. Most serious offence 1981-1991, 1995, 1998-2002
10. Aggregate sentence 1981-1991, 1994-2002
11. Time served since last admission 1981-1991, 1994-2002
12. Number of previous commitments 1981-2002
13. Region of sentence 1987-1991, 1995, 1998-2002

2. Offender and Offence Characteristic Measures

Offender Characteristic Measures		
Variable	Grouping Reported	
Age	<18 18-24 25-34	35-49 50+ Unknown
Race	Caucasian North American Indian Metis Inuit	Asiatic Black Other Unknown

3. Offender and Offence Characteristics Defined

Offender Characteristics	
Age	The current age of the inmate (in years only) as of the date of the profile (March 31 of the given year except for 1981 which is September 30).
Race	The particular ethnic or racial group the inmate claims to identify with.
Marital Status	The marital status claimed by the inmate at the time of her admission.
Citizenship	The country in which the inmate established citizenship.
Primary Language Spoken	The language(s) the inmate claims as her primary language at the time of admission.
Region of Residence at Time of Conviction	The inmate's region of residence at the time of conviction for the offence.

Offence Characteristics	
Type of Admission	The basis for the inmate's reception and admission to a penitentiary.
Major Offence	<p>The offence for which the inmate was given the longest sentence for the current period of incarceration. If the same length of sentence was awarded to more than one offence, the major offence is the most serious as measured by the maximum penalty allowed by law. If more than one offence has the same maximum penalty, major offence is the first of these offences listed on the warrant of committal.</p> <p>Note: If the inmate is admitted on a technical violation (violates conditions of her release, but has not been sentenced for an offence) the major offence reverts to the previous major offence.</p>
Aggregate Sentence	The total of all the sentences awarded to the inmate for her current term of incarceration, including any remnant of parole or mandatory supervision period if the parole or mandatory supervision was revoked.
Time Served Since Last Admission	The length of time the inmate has served since her most recent admission date.
Number of Previous Commitments	<p>The number of previous admissions to a federal institution.</p> <p>Note: This does not include sentences completed prior to 1970.</p>
Region of Sentence	The region in which the inmate was sentenced for her major offence.

APPENDIX B: MOST SERIOUS OFFENCE DEFINITIONS

Other Sexual Offences	Attempted Rape; Sexual Assault; Sexual Intercourse with Female Under 14; Sexual Intercourse with Female Under 16; Sexual Intercourse with Feeble Minded; Indecent Assault on Female; Incest; Seduction of Female Under 18; Seduction with Promise of Marriage; Sexual Intercourse with Step-Daughter; Sexual Intercourse with Female Employee, Seduction of Female Passenger on Vessel; Buggery or Bestiality; Indecent Assault on Male; Gross Indecency
Kidnapping and Abduction	Kidnapping; Forcible Confinement; Abduction of Female; Abduction of Female Under 14, Abduction of Female Under 16
Wounding	Causing Bodily Harm with Intent to Wound, Maim or Disfigure; Causing Bodily Harm with Intent to Endanger; Causing Bodily Harm with Intent to Prevent Arrest or Detention
Assaults	Causing Bodily Harm to Servant or Apprentice, Common Assault (Old Legislation), Assault Causing Bodily Harm; Assault with Intent
Robbery	Robbery with Violence, Armed Robbery, Robbery, Stopping Mail with Intent
Offensive Weapons	Intent to Cause Explosion; Explosive Substance Likely to Cause Death or Bodily Harm; Explosive Substance Likely to Cause Property Damage; Possession of Explosives; Possession of Explosive Substance; Possession of Bomb, Grenade, etc.; Use of Firearm in Committing or Attempting to Commit; Point Firearm, Careless Use of Firearm; Possession of Weapon Dangerous to Public Peace; Possession of Weapon at a Public Meeting; Carry Concealed Weapon; Possession of a Prohibited Weapon; Prohibited Weapon in a Car; Possession of Unregistered Restricted Weapon; Possession of a Weapon in a Place Not Indicated on Certificate; Delivering Weapon to Person Under 16; Wrongful Delivery of Firearms; Importation or Delivery of a Prohibited Weapon; Delivery of Restricted Weapon to a Person Without Permit; Importing Restricted Weapon; Delivery of Firearm to Person without Acquisition Certificate; Acquisition of Firearm without Acquisition Certificate; Possession of a Weapon While Prohibited by Court; Alter, Deface or Remove Serial Number of Firearm; Possession of Weapon with Altered, Defaced or Removed Serial ; Alter, Deface or Remove Serial Number of Firearm; Possession of Weapon with Altered, Defaced or Removed Serial ; Failure to Report Found, Lost, Misplaced or Stolen Weapon; False Statement in Procuring Firearm Acquisition Certificate; Tamper with Acquisition Certificate; Failure to Comply with Conditions on Certificate

Prison Breach	Prison Breach by Force or Violence; Prison Breach with Intent; Escape Lawful Custody; Unlawfully at Large; Failure to Attend Court; Breach of Condition; Summons – Failure to Appear; Fail to Attend; Appearance Notice – Failure to Appear; Permit Escape – Assist Escape; Direct Escape; Rescue/Assist escape; Peace Officer or Prison Employee Permits Escape; Assist Prisoner of War or Parolee to Escape
Break and Enter	Break and Enter with Intent; Break, Enter and Commit; Break Out-Dwelling-Other; Unlawfully in Dwelling
Theft	Theft; Theft Over; Theft Under; Theft of Cattle; Take Motor Vehicle or Vessel without Consent; Theft, Concealment, Forgery, etc. of Credit Cards; Theft from the Mail
