**Adult Male Offenders in Canada:
Recent Trends**

**ADULT MALE OFFENDERS IN CANADA:
RECENT TRENDS**

by:

Colleen Anne Dell, Roberta Lynn Sinclair, and Roger Boe

Research Branch
Correctional Service Canada

December, 1998

- At the national level, no. There has been a decrease in the rate of adult males charged by police. It decreased from 413 per 10,000 adult male population in 1992 to 311 in 1997.
- At the regional level, no. There has been a decrease in the rate of adult males charged by police.
- By offence category, there was a substantial decrease in property crimes (143 to 100 per 10,000) and other crimes (129 to 95 per 10,000). There was a decrease in violent crimes (107 to 88 per 10,000) and drug offences (34 to 27 per 10,000).

2. Has there been an increase in adult males processed through the court system, 1994/95 - 1996/97?

- At the national level, there was a decrease in the rate of adult males processed through the court system. It decreased from 338 per 10,000 adult male population in 1994/95 to 312 in 1996/97.
- At the regional level, rates within the Quebec, Ontario and Prairie regions declined slightly. Increases were noted in the Pacific region (437 to 402 per 10,000) and the Atlantic region (246 to 309 per 10,000).
- By offence category, from 1994/95 to 1996/97, there was a decrease in violent crimes (86 to 78 per 10,000), property crimes (101 to 94 per 10,000), and other crimes (125 to 115 per 10,000). Drug crimes remained relatively stable (approximately 25 per 10,000).

3. Are adult males getting involved with crime at a younger age?

- At the national level, no.
- A mean age of 32 in 1994/95 increased slightly to 33 in 1995/96 and returned to 32 in 1996/97.

4. Are adult males getting more violent?

- According to the Uniform Crime Report Survey, from 1992 to 1997, the national rate of violent crime among adult males has declined from 107 to 88 per 10,000 adult male population.
- Since 1992, there was an overall trend decrease in the rate of adult males charged for a violent crime in the Atlantic region (92 to 75 per 10,000), Ontario region (108 to 84 per 10,000), Prairie region (138 to 125 per 10,000) and Quebec region (86 to 59 per 10,000). The Pacific region had an overall slight increase (113 to 150 per 10,000).
- By offence, homicide, attempted murder and abduction remained stable at a low rate (approximately 0.4 per 10,000). There was a notable decrease in sexual assault and other sexual offences (12 to 8 per 10,000) and a decline in non-sexual assault (86 to 75 per 10,000) and robbery (7 to 5 per 10,000).
- Adult Criminal Court Survey statistics indicate a decrease at the national level from 86 per 10,000 adult male population in 1994/95 to 78 in 1996/97 in the number of adult males processed through court for a violent offence.
- Focusing on specific offences over the 3-year period, there was stability in homicide and attempted murder (0.4 per 10,000). Sexual assault and other

sexual offences decreased from 10 per 10,000 in 1994/95 to 8 in 1996/97. Major assault and common assault decreased very slightly from 7 per 10,000 in 1994/95 to 6.5 in 1996/97. There was a steady rate of abduction (0.1), while there was a *very* slight increase from 1994/95 to 1996/97 in robbery (3.9 to 4.2 per 10,000) and kidnapping (0.3 to 0.4 per 10,000).

5. Are adult males getting more serious dispositions?

- At the national level, prison, probation, restitution and fine dispositions remained relatively stable from 1994/95 to 1996/97. Unknown and other dispositions remained relatively stable from 1994/95 to 1995/96 followed by a significant decrease in 1996/97.
- At the regional level the most notable findings were:
 - Atlantic: All dispositions except prison decreased from 1994/95 to 1995/96 followed by an increase in 1996/97, with the exception of prison disposition.
 - Quebec: All dispositions remained relatively stable.
 - Ontario: There was a slight increase in probation (22 to 26 per total adult male disposition) and other dispositions (0.4 to 2.2 per total adult male disposition). There was a slight decrease in prison (41 to 40 per total adult male disposition) and fine disposition (31 to 30 per total adult male disposition).
 - Prairie: An increase in probation (22 to 17 per total adult male disposition), restitution (0.1 to 0.2 per total adult male disposition) and fine disposition (44 to 49 per adult male disposition). There was relative stability in prison disposition (29 per total adult male disposition) and other dispositions (3.0 per total adult male disposition).
 - Pacific: An increase in prison (42 to 46 per total adult male disposition), probation (26 to 31 per total adult male disposition) and other dispositions (0.5 to 2.8 per total adult male disposition). A decrease in fine (31 to 21 per total adult male disposition).

NOTE

- The unit of analysis is cases processed (Adult Criminal Court Survey) and incidents or persons charged (Uniform Crime Report) (in the latter case this includes the number of people charged or recommended for charges by police, not the number of charges laid or recommended to be laid against those people). An explanation and definition of the data sources are presented in Appendix A to Appendix C respectively. For further clarification, please refer to the original source.
- The Adult Criminal Court Survey data are presented for fiscal years. The Uniform Crime Report Survey data are presented for calendar years. Caution must therefore be made in comparison of the data sources. As well, the Postcensal and updated Postcensal population estimates (Statistics Canada) are for July 1 of the indicted years.
- The data sources and population estimates used in this report may not be the most recent revision of the data. The Canadian Centre for Justice Statistics revises data the year following the original release. The changes, however, are small and do not effect the findings of this report.
- The 1992/93 and 1993/94 Adult Criminal Court Surveys are not used in this report. They represent only 30% survey coverage whereas the 1994/95, 1995/96 and 1996/97 represent approximately 80% coverage. The 1994/95 and 1995/96 surveys account for Newfoundland, Prince Edward Island, Nova Scotia, Quebec, Ontario, Saskatchewan, Alberta, Yukon and the Northwest Territories. The 1996/97 survey accounts for Newfoundland, Prince Edward Island, Nova Scotia, Quebec, Ontario, Saskatchewan, Alberta and the Yukon.
- To contextualize the UCR findings in this report, the rate of adult males and females and youth males and females charged by police increased from 1984 - 1991. From 1991 to 1996, the rates, overall, declined¹.

RESEARCH QUESTIONS

QUESTION 1:

HAS THERE BEEN AN INCREASE IN ADULT MALES CHARGED BY THE POLICE?

QUESTION 2:

HAS THERE BEEN AN INCREASE IN ADULT MALES PROCESSED THROUGH THE COURT SYSTEM?

QUESTION 3:

ARE ADULT MALES GETTING INVOLVED WITH CRIME AT A YOUNGER AGE?

QUESTION 4:

ARE ADULT MALES GETTING MORE VIOLENT?

QUESTION 5:

ARE ADULT MALES GETTING MORE SERIOUS DISPOSITIONS?

- * Refer to Appendix A for definitions of data sources**
- ** Refer to Appendix B for format of data presentation**

QUESTION 1:

HAS THERE BEEN AN INCREASE IN ADULT MALES CHARGED BY THE POLICE, 1992 - 1997?

Canada

- Overall there was a decrease. This is true for the number of adult males charged by police and the rate of adult males charged by police per 10,000 adult male population.
- By offence, there was a marked decrease in property crimes and other crimes from 1992 to 1997. There was a decrease in violent crimes and drug offences from 1992 to 1997.

Regions

- In the Atlantic region there was a notable decrease from 1992 to 1997, excluding a slight increase in 1996.
- In the Quebec region there was a substantial decrease from 1992 to 1997.
- In the Ontario region there was a decrease from 1992 to 1997.
- The rate declined substantially in the Prairie region from 1992 to 1997. The greatest decrease was between 1994 and 1995.
- There was a decrease in the Pacific region from 1992 to 1993, followed by a slight increase from 1993 through to 1996 and a decrease in 1997, the lowest recorded rate.
- The Prairie region had the highest rate per 10,000 adult male population, followed by the Pacific, Ontario, Quebec and Atlantic regions.

QUESTION 2:

HAS THERE BEEN AN INCREASE IN ADULT MALES PROCESSED THROUGH THE COURT SYSTEM, 1994/95 - 1996/97?

Canada

- Overall, there has been a decrease.
- By offence, there was a decrease in violent, property, and other crimes from 1994/95 to 1996/97.
- Drug crimes remained stable at approximately 26 per 10,000 adult male population over the 3-year period.

Regions

- Overall, from 1994/95 to 1996/97 there was a notable increase in the Pacific region (noting a decrease from 1995/96 to 1996/97) and an increase in the Atlantic region.
- The Quebec region decreased slightly, while the Ontario and Prairie regions decreased from 1994/95 to 1996/97.
- The Pacific region had the highest rate per 10,000 adult male population, followed by the Prairie, Ontario, Atlantic and Quebec regions.

Table 2.1: Adult Males Processed Through the Court System*, Canada

(The Canada total does not include British Columbia, Manitoba and New Brunswick for 1994/95 and 1995/96 and the Northwest Territories for 1996/97)

Chart 2.3A: Adult Males Processed Through the Court System Per 10,000 Adult Male Population, Regions

QUESTION 3:

ARE ADULT MALES GETTING INVOLVED WITH CRIME AT A YOUNGER AGE?

Canada

- Overall it appears males are not getting involved with crime at a younger age. This is true for both adult males charged by police and the rate of adult males charged by police per 10,000 adult male population.
- A mean age of 32 in 1994/95 increased slightly to 33 in 1995/96 and returned to 32 in 1996/97.

Regions

- Examining the total rates of adult males processed through court, by principle charge and age, the following is characteristic of each region:

Atlantic Region: A steady trend with the lower the age the greater the rate of adult males processed through the court system. There was a lower rate in 1994/95 in comparison to the 1995/96 and 1996/97 rates of males processed through court per 10,000 adult male population.

Quebec Region: A steady trend with the lower the age the greater the rate of adult males processed through the court system.

Ontario Region: A steady trend with the lower the age the greater the rate of adult males processed through the court system.

Prairie Region: A steady trend with the lower the age the greater the rate of adult males processed through the court system.

Pacific Region: A steady trend with the lower the age the greater the rate of adult males processed through the court system. There was, however, an anomalous high rate of adult males aged 25-34 who were processed through the court system per 10,000 adult male population in 1995/96.

QUESTION 4:

ARE ADULT MALES GETTING MORE VIOLENT?

Canada

Uniform Crime Report:

- Overall, there was a trend decrease. Since 1992, the national rate of violent crime among adult males has declined from 107 to 88 per 10,000 adult male population.
- By offence, there was a relatively steady rate of homicide, fluctuating between 0.5 and 0.3 per 10,000 adult male offenders over the six-year period.
- There was a steady rate of attempted murder, fluctuating between 0.7 and 0.5 per 10,000 adult male population over the six-year period.
- There was a slight increase in the rate of sexual assault and other sexual offences from 1992 to 1993, followed by a steady decrease through to 1997.
- Overall, there was a decrease in the rate of non-sexual assault from 1992 to 1997.
- There was a relatively steady rate of abduction from 1992 to 1997.
- There was an overall decrease in robbery from 1992 to 1997.
- The highest rate of charges for a violent offence occurred in the order of non-sexual assault, sexual assault and other sexual offences, robbery, attempted murder, homicide and abduction.

Adult Criminal Court Survey:

- From 1994/95 to 1996/97 there was a decrease in the number of adult males processed through the adult court system for a violent offence per 10,000 adult male population.
- There was stability in the three-year period for the rate of homicide and attempted murder. Sexual assault and other sexual offences decreased from 1994/95 to 1996/97. Major assault and common assault decreased slightly from 1994/95 to 1996/97. Robbery and kidnapping increased slightly from 1994/95 to 1996/97. Abduction remained stable over the three-year period.

Regions

Uniform Crime Report

- Acknowledging regional variation, there was a decrease in adult males charged by police for a violent offence.
- Regional variation: The Atlantic region decreased from 1992 to 1995, and remained relatively stable through to 1997. The Pacific region increased from 1992 to 1994, followed by a decline in 1995 with relative stability through to 1997. The Prairie region increased from 1992 to 1993, followed by an overall decrease to 1997. The Ontario region decreased from 1992 to 1996, followed by a slight increase through to 1997. The Quebec region decreased from 1992 to 1997.
- The Prairie region had the highest rate per 10,000 adult male population, followed by the Pacific, Ontario, Atlantic and Quebec regions.

QUESTION 5:

ARE ADULT MALES GETTING MORE SERIOUS DISPOSITIONS?

Canada

- For the most serious disposition, prison, and the second most serious disposition, probation, there was relative stability from 1994/95 to 1996/97. Fine, restitution and other dispositions also remained fairly stable from 1994/95 to 1996/97. Unknown dispositions were fairly stable from 1994/95 to 1995/96 and then decreased significantly in 1996/97.

Regions

- Atlantic Region:** Prison dispositions increased significantly from 1994/95 to 1995/96 and decreased in 1996/97 to slightly above the 1994/95 level. Probation decreased slightly from 1994/95 to 1995/96 followed by a slight increase in 1996/97. Fine decreased and then remained stable while restitution remained relatively stable throughout the three-year period. The category of other dispositions decreased from 1994/95 to 1995/96 and increased in 1996/97.
- Quebec Region:** Relative stability in prison, probation, and restitution from 1994/95 to 1996/97. Slight decrease in fine and stability in other dispositions from 1994/95 to 1995/96 followed by an increase in 1996/97.
- Ontario Region:** Relative stability in prison and fine. Relative stability in probation from 1994/95 to 1995/96 with an increase in 1996/97. Stability in restitution from 1994/95 to 1995/96 with a slight increase in 1996/97. Stability in the category of other crimes from 1994/95 to 1995/96 with a substantial increase in 1996/97.
- Prairie Region:** Prison remained relatively stable from 1994/95 to 1996/97. A slight increase in restitution from 1994/95 to 1995/96 followed by a slight decrease in 1996/97. Increase in fine and decrease in probation from 1994/95 to 1995/96, followed by stability in 1996/97. Overall stability in the category of other crimes from 1994/95 to 1996/97.
- Pacific Region:** Overall stability in restitution from 1994/95 to 1996/97. Stability in fine from 1994/95 to 1995/96 followed by a dramatic decrease in 1996/97. Dramatic increase in the category of other crimes from 1994/95 to 1995/96 followed by relative stability through to 1996/97. Increase in prison from 1994/95 to 1995/96 followed by a decrease through to 1996/97. Notable decrease in probation from 1994/95 to 1995/96 followed by a substantial increase in 1996/97.

Order of greatest frequency of dispositions per region:

- Atlantic & Prairie Regions:** Fine, Prison, Probation, Other, Restitution
Quebec Region: Probation, Fine, Prison, Other, Restitution
Ontario Region: Prison, Fine, Probation, Other, Restitution
Pacific Region: Prison, Fine, Probation, Other, Restitution

** Disposition is the most serious disposition for a person or a case. When there is more than one charge the following rule applies: Dispositions are ordered from most to least serious: 1) Found guilty; 2) Transfer to Superior Court; 3) Other (acquitted due to insanity, waived out of province); 4) Stay, 5) Acquitted, Withdrawn, Dismissed, Discharged at Preliminary; and 6) Unknown. The most serious sentence order of ranking is: 1) Prison; 2) Probation; 3) Fine, 4) Restitution/compensation, 5) Other (absolute or conditional discharge, suspended sentence, other).

*** "Other" most serious sentences include absolute and conditional discharge, suspended sentence, payment of legal costs and suspension of drivers license.

APPENDIX A

DATA SOURCES

1. UNIFORM CRIME REPORT SURVEY (UCR)

- A continuous historical record of crime and traffic statistics that have been investigated and reported by every police agency in Canada since 1962.
- As of 1995, there were approximately 1,800 separate police locations responding to the Survey, accounting for approximately 420 different police forces. The most significant loss of information occurs in the rare situation where a police force fails to submit data to the Centre. In this situation, estimates are calculated for that particular force.
- Collected information includes the number of criminal incidents, the clearance status of those incidents and information on persons charged.
- Data is available for nearly 100 separate criminal offences.
- Incidents are classified according to the most serious offence occurring in the incident (generally the offence which carries the longest maximum sentence under the Criminal Code of Canada). Violent offences always take precedence over non-violent offences (i.e., an incident involving a breaking and entering offence and an assault is counted as an assault incident).

2. REVISED, OR INCIDENT BASED, UNIFORM CRIME REPORT SURVEY

- In 1984 the UCR Survey was re-developed to expand the information collected from the UCR Survey.
- The Revised UCR Survey allows detailed examinations of accused and victim characteristics (e.g., age, sex, alcohol/drug consumption, relationship, level of injury and weapon causing injury), as well as characteristics of the incident itself (e.g., location, targets of violations, secondary violations, the presence of weapons, property type, date and time).
- In 1996, the Revised UCR Survey had 154 police forces reporting to it, representing about 47% of the national volume of reported crime: 39% of incidents were from Quebec, 38% from Ontario, 10% from Alberta, 8% from British Columbia, 4% from Saskatchewan and 1% from New Brunswick. With the exception of Quebec, the majority of police departments are urban.

3. ADULT CRIMINAL COURT SURVEY

- A national database of statistical information on charges, cases and persons involving accused who are aged 18 years or older, companies and youths that have been raised to adult criminal court.
- The data on completed federal statute charges are collected by the Canadian Centre for Justice Statistics in collaboration with provincial and territorial government departments responsible for provincial criminal courts.
- The primary unit of analysis is the case, which is defined as one or more charges laid against an individual and disposed of in court on the same day.
- Coverage is of provincial criminal courts in seven provinces and two territories (representing approximately 80% of the national provincial criminal court caseload). They are Newfoundland (2.0%), Prince Edward Island (0.4%), Nova Scotia (4.1%), Quebec (20.6%), Ontario (50.9%), Saskatchewan (6.5%), Alberta (14.3%), Yukon (0.5%) and the Northwest Territories (0.7%).
- Data for federal statute offences heard in Quebec's municipal courts are not currently available. It is estimated that approximately 20 percent of federal statute charges in Quebec are heard in municipal court.
- In Quebec, sex is determined on the basis of the accused's name, producing a relatively higher rate of sex unknown.

4. CANADIAN CENSUS

- Source: Statistics Canada, Census and Household Statistics Branch, Demography Division (Updated Postcensal Estimates for 1992, 1993, 1995; and Preliminal Postcensal for 1994, 1996 and 1997).
- Note that the population estimates used in this report are not the most recent. However, the changes are very slight and do not affect the results. To illustrate, the most recent population statistics available are the Final Postcensal Estimates for 1992; Updated Postcensal Estimates for 1993, 1994, 1995; and Preliminal Postcensal for 1996 and 1997.

APPENDIX B

DATA PRESENTATION

- This report presents data on the national and regional levels separately and provides comparisons between regions. This is done because there is often disparity between regions and Canadian totals are greatly influenced by what occurs in large population provinces, such as Ontario.
- The wording in this report, specifically the definitions, are often extracted verbatim from the sources (i.e., Uniform Crime Report and Adult Criminal Court Survey). If further clarification is needed on any definition, please refer to the original source.

APPENDIX C

DATA SOURCE EXPLANATIONS

Adult Criminal Court Survey

- A **case** is one or more charges against a person or corporation, where the charges are disposed of in the same court on the same date. Charges are linked to a case on the basis of court location, accused identifier and date of last court appearance. The offences listed in each “case-based” table contain offence information on the one offence defined as the most serious in each case.

Uniform Crime Report

- An **incident** is the basis for counting reported crime. An incident is the set of connected events usually constituting an occurrence report. In the aggregate survey, the incident is used in conjunction with the Most Serious Offence rule to form the aggregate offence counts (see below for definition of the Most Serious Offence rule). In the incident based survey, information for each incident is reported individually. Aggregate most serious offence rules are then applied to these data in order to reconcile them with historical aggregate counts as well as with data from aggregate respondents.
- **Most Serious Offence Rule** - The UCR classifies incidents according to the most serious offence in the incident. In categorizing incidents, violent offences always take precedence over non-violent offences. The UCR Survey scores violent incidents differently from other types of crimes. For violent crimes, a separate incident is recorded for each victim (categorized according to the most serious offence against the victim). If, for example, one person assaults three people, then three incidents are recorded. If three people assault one person, only one incident is recorded. For non-violent crimes, one incident (categorized according to the most serious offence in the incident) is counted for every distinct or separate occurrence.
- Robbery is an exception to the above ruling. Robbery is categorized as a violent offence. Unlike all other violent offences, one occurrence of robbery is equal to one incident, regardless of the number of victims. The reason for this exception is that robbery can involve many people who could all be considered victims. For example, in a bank robbery with 5 tellers and 20 customers present, 25 incidents of robbery would be counted if the normal

scoring rule for violent incidents were applied. This would seriously overstate the occurrence of robbery.

- Thus, the total number of incidents recorded by the UCR survey is not a census of all violations of the law that come to the attention of the police. Rather, it is equal to the number of victims of violent crimes (other than robberies) plus the number of separate occurrences of non-violent crimes (and robberies).
- **Persons charged** - The UCR also records the number of persons charged. For incidents that are cleared, the survey collects the number of adults charged by gender, as well as the number of youths (aged 12 to 17 years) charged by gender. The “persons charged” category includes the number of people charged or recommended for charges by police, not the number of charges laid or recommended to be laid against those people. A person who is simultaneously charged with more than one offence is counted according to the most serious offence, even if the offences occurred in more than one incident. In addition, persons may be counted more than once throughout the year; that is, individuals are counted on each occasion that they are charged by the police.
- Persons charged refers to persons who were charged in connection with a particular incident. These persons, however, may have been charged later with a lesser offence. For example, a person who commits a breaking and entering offence may be charged with possession of stolen goods if, for instance, the police have stronger evidence on the latter offence. Both the actual incident and the person charged are counted under breaking and entering, even though the person was actually charged with possession of stolen goods.
